

AMENDMENTS TO THE CLAIMS:

1. ~~(Canceled) An insecticidal composition comprising a compound having an inhibitory effect on acyl CoA:cholesterol acyltransferase activity or a salt thereof as an effective ingredient.~~

2. **(Currently Amended)** ~~The insecticidal composition according to claim 1, wherein the compound having the inhibitory effect on acyl CoA:cholesterol acyltransferase activity is one or more~~
A method, comprising:

contacting insects with a compound selected from the group consisting of compounds represented by the following Formulas 1 to 11.

[Formula 1]

[Formula 2]

[Formula 3]

[Formula 4]

[Formula 5]

[Formula 6]

[Formula 7]

[Formula 8]

[Formula 9]

[Formula 10]

[Formula 11]

allowing the compound to have an inhibitory effect on acyl CoA:cholesterol acyltransferase activity in the insects, thereby killing the insects.

3. **(Currently Amended)** The ~~insecticidal composition method~~ according to claim 2, wherein the compounds of the Formulas 1 to 4 are prepared by a process comprising:
- culturing *Penicillium griseofulvum* F1959;
 - extracting the cultured cells with ethyl acetate; and
 - chromatographing the resulting extract.
